

# Tamil Nadu Solar Energy Policy

## HIGHLIGHTS

<b>Nodal Agency</b>	Tamil Nadu Energy Development Agency (TEDA).
<b>Technologies</b>	Solar photovoltaic and solar thermal.
<b>Policy Period</b>	Not available
<b>Targets under Policy</b>	9000 MW of solar power by 2023. 40% of target to be accomplished by consumer category.
<b>Grid-connectivity</b>	<ul style="list-style-type: none"><li>• For utility consumers, the energy can be fed at any voltage level with the condition of no wheeling service at LT level.</li><li>• For captive consumers, any excess energy injected into the grid will be credited at a tariff determined by the Commission from time to time.</li></ul>
<b>Eligibility Conditions</b>	Not available.
<b>Exemptions</b>	<ul style="list-style-type: none"><li>• Consumers generating energy for self-use will be exempted from electricity tax till 2021.</li><li>• Renewable energy projects installed for study or research purposes will be given exemptions from charges upon request to the nodal agency.</li></ul>
<b>Evacuation Arrangement</b>	Wheeling is available for plant capacity of 1 MW and above.
<b>Mandates</b>	<ul style="list-style-type: none"><li>• Buildings following ECBC rules must install solar technology.</li><li>• Promotion of electric vehicle and solar-powered charging station.</li><li>• Concentrated solar power technology must be adopted by industrial establishments.</li></ul>
